

# ASBIS Robotic Solutions

ASBIS Robotic Solutions (AROS) offers a wide range of multipurpose collaborative robots in CEE, by providing Value Added Distribution (VAD), promoting automation solutions & growing market presence via network of Value Add Resellers (VAR).

There are several lines of business where robotics solutions could bring valuable advantages:

- Education  
Solutions for boosting teenage skills

- Cleaning

Cobot janitors offer a more cost-efficient and productive means of managing the industrial cleaning demands of large facilities like parking, warehouses, industrial sites, office building, HoReCa.

- Delivery

Delivery cobots provide various benefits to different verticals, from supply delivery restaurants, hotels, hospitals, and nursing homes to courier functions in large office space and many more.

- Production line

Collaborative robotics help both big businesses and SMEs grow and automate processes in their factories, warehouses, research facilities, etc.

- Service kiosks

Service cobots are used primarily in HoReCa. A collaborative robot can prepare and serve fast and make it 24/7 with consistency and quality that is tough for humans to offer.

- Security & Surveillance

Security cobots patrol around buildings and offices (as well as indoors), watch the area of trust, and interact with people occasionally.
